# Kevin Combriat

**Web Developer. JavaScript, Ruby and Rust Enthusiast.**

**Shin-Nakano, Tokyo, Japan**

japan.combriat.kevin@gmail.com

My GitHub / Functional JavaScript

*I am a junior web developer*
*Knowledge thirsty, I'm able to learn new programming languages*
*and new technologies quickly and easily*

*I speak French and English, and am currently learning Japanese*

## Abilities

**Front end**

- **HTML** - HAML, Slim, Jade
- **CSS** - Sass / Scss, Less
- **JavaScript** - CoffeeScript, LiveScript, ClojureScript
- **Frameworks** - jQuery / jQuery UI, AngularJS, Twitter Bootstrap, Backbone

**Databases**

- **MySQL** - CLI, Active Record
- **MongoDB** - CLI, MongoMapper, Mongoose

**Other languages I enjoy to hack with:**

Rust, Haskell, and Scala

**Back end**

- **JavaScript** - NodeJS (Express, SailsJS)
- **Ruby** - Rails, Sinatra
- **Python** - Flask
- **Clojure** - Compojure
- **PHP** - CakePHP

**Tools**

- Command-line interface
- Git
- Vim
- Linux (Debian / Ubuntu), Mac OS X

## Experiences

### Tibanne                                                                 Tokyo

**www.tibanne.com - www.forever.net**

**Front-End Web Developer**                          **November 2013 - August 2014**

> In this French/Japanese company based in Tokyo, I have worked on the Forever.Net website as the only Front-End developer. I have been responsible for the whole integration, the CSS, the HTML and the JavaScript Development. This experience in a small company also allowed me to communicate a lot with the different departments, and therefore allowed me to improve my skills both in English and in communication.

- JavaScript Development
  - Form Validations
  - Usage of different APIs
  - jQuery
- CSS / HTML Integration
- Continuous communication with the different departments to fulfill their needs

### Freelancer                                                      Paris - Tokyo

**Web Developer**                                          **April 2012 - Present**

> I decided to take one year to work on different technologies and languages and to travel. I learned Clojure, Scala, and grew accustomed to Java programming and ecosystem during that period.

- Learning **Java language** and **ecosystem** and languages which compile to Java bytecode:
  - Scala

- Clojure
- System oriented programming (mainly in Haskell and Rust)
- Improving my ability to work on algorithms

## QuelleEnergie                          Paris, France

**www.quelleenergie.fr - Advisor in energy savings**

**Web Developer**                          **April 2011 - April 2012**

> I was part of a small team of four managing a quickly growing website. I learned Ruby and Rails with two of the most competent developers in Paris. I was responsible for a variety of tasks including both front-end and back-end development, from HTML/CSS and JavaScript integration to DB migrations and management.

- **Agile** method and **TDD**
- Back-End development with **Ruby** (**on Rails**)
- **Front-End development**
- **MySql** databases management
- **Redis** for heavily used data

# Education

## Epitech                          Paris, France

**April 2010 - April 2011**

> A one-year formation where I learned HTML/CSS, PHP and MySQL. I used JavaScript and PHP to create blogs, one e-business website from scratch, and some other projects.

- PHP - JavaScript - HTML/CSS - MySql
- Creating blogs and e-business website

## QuelleEnergie                          Paris, France
